Since 1984, Thomas Transport Packs™ have been synonymous with the finest quality and most innovative EMS packs in the world. While this history of innovation continues at Thomas with the introduction of the new ALS Ultra Roller and ALS Roller, we are proud to announce the development of a number of new innovative EMS products. These products, and many more currently being evaluated, represent some of the most innovative, high quality, and practical products on the market today.

**WARRANTY & REPAIR**

As always, every Thomas product must pass strenuous field testing before being presented to our loyal customers. Rest assured that every Thomas EMS product is made from the highest quality materials and components available, and is built to stand the test of time. Thomas EMS guarantees all of our products against defects in workmanship and / or materials for the practical life of the product.

**Returns and Repairs** - Items returned for repair must be prepared according to the more recent OSHA requirements. Items must be properly cleaned and verified with a statement on the outside of the package. Also, prior to returning any product, please contact our customer service department to obtain direct shipping information. Please also keep in mind that while every effort has been made to ensure the accuracy of the pricing and product information displayed herein, all pricing and specifications are subject to change without notice.

THOMAS PEDIATRIC PACK

Thomas EMS is proud to debut the “Thomas Pediatric Pack”
The most organized and complete pre-hospital pediatric pack in the industry.

Main Compartment
Eight separate high-visibility, removable pouches designed to treat all pediatric patients up to 36kg. Each pouch is designed to accommodate all of the medical equipment necessary to treat pediatric patients in every specified weight range.

All non-weight specific pediatric equipment (BVM, intubation handles, Magill forceps, syringes, etc…) can be stored inside the main inside chamber, or on the interior fold out flap. The fold out flap includes a neo-natal kit, and also features an area to display all quick reference material such as APGAR, Rule of 9, or other important local pediatric treatment information (burn center, poison control, etc…)

Interior Pouches
The interior of each removable pouch is constructed from a dry erase board material, which allows the medic to clearly label all equipment. Each pouch also includes an attached reference medication chart specific to each weight range, and a small vinyl note card size exterior sleeve to quickly and easily monitor expiration dates of all equipment contained within the pouch.

The Thomas Pediatric Pack can also be used in conjunction with all existing pediatric systems.

Fold-down front pocket accommodates all mask sizes from neonate through small adult.

Dimensions: 14” x 19” x 9 1/2”

Inside lid section consist of two large clear vinyl pockets designed to store multiple pediatric c-collars and larger equipment.

Made from rugged 1000 Denier Cordura, with a heavy-weight, fluid resistant nylon base for easy decontamination. Includes both a shoulder strap and carrying handles.

Item    Description         Price
TT105   Thomas Pedi Pack (w/o supplies) $560.00
TT105F  Fill Kit Only       $690.00
The Thomas Heating Pack is the largest and most complete IV fluid and medication warmer in the EMS industry.

Features of the pack include three interior color-coded pockets with elastics designed to hold medications or other IV supplies, and two removable clear vinyl exterior pockets. The outside of the Thomas Heating Pack is constructed from 1000D water resistant fabric with protective foam and aluminum insulated polyethylene bubbles for maximum heat radiance and temperature maintenance. The exterior of the pack also includes reflective striping for improved visibility.

**Additional Features:**
- Adjustable backpack straps with chest connect for long distance rescue and treatment. Backpack straps can also be tucked away inside the pack if not needed.
- Holds up to 3 liters of IV fluids as well as all tubing accessories, medications, emergency blankets, blood pressure cuff and stethoscope, rope, and other rescue / treatment accessories.
- Includes 1 fully-insulated IV bag (pressure infused capable) with removable insulated tubing (both pictured below).
- Includes a redi-splint that serves as the frame of the pack and provides additional protection and insulation.
- Pre-set 98 degree temperature maintenance (+/- 1 degree) while plugged in.
- Fuse protected and easily removable aluminium heating element.
- 12 volt operation.
- 1 year electronics warranty.

Let’s ROLL!!
The ALS Ultra Roller represents the next generation in EMS ergonomics, eliminating the stress and strain of traditional paramedic equipment transport, while still maintaining all of the features of the ALS Ultra.

Key NEW Features
Ultra light (under 3.3 pounds!) internal frame featuring a telescoping handle and inset wheel system, while still maintaining full “backpack” functionality.

Impervious, quick-clean back panel which allows for rapid and easy decontamination and cleaning post-response.

Upgraded, dual-adjust backpack straps with chest connect and “tuck-away” pocket, which allows the backpack straps to remain connected for quick carrying, yet protected from contaminants and everyday wear and tear.

Oxygen and Airway Components
The ALS Ultra Roller and ALS Ultra are designed to accommodate up to a jumbo D size oxygen cylinder. The design of the ALS Ultra packs makes O2 access quick and easy by simply unzipping the top zipper pocket of the pack, which exposes the oxygen cylinder’s valve, and eliminates the need to remove the cylinder to administer oxygen to the patient. These packs also include a cylinder sleeve and straps to secure the sleeve to the base of the pack.

The airway section consists of three separate and removable color coded pouches, designed to hold an adult BVM and airways, a pediatric BVM, and a small intubation pouch set (handle, 4 blades, syringes, and other accessories). Each pouch now also contains a clear vinyl window for quick and easy labeling and identification of each pouch’s contents. A large interior clear vinyl removable support pouch, located on the inside lid of the pack, is also capable of holding approximately 16 ET tubes.

Intubation Pouch (TT400)
Center Airway Pouch (TT103)
Pediatric Airway Pouch (TT102)
I.V. Section
I.V. Fluids and accessories can be stored in three separate and removable fully self-contained I.V. pouches. All equipment necessary to start a peripheral I.V. line can be enclosed within each of these pouches, including 1000 ml of liquids, catheters, tubing, gauze, and swabs.

Support Pouches
This section consists of four versatile clear vinyl pouches designed to carry a wide variety of equipment and support supplies. The two large exterior pockets (now deeper and wider) provide additional storage space, designed to accommodate additional medications or a complete airway set.

Cardiac / Drug Box
Our soft drug box is protected by two pieces of poly-corrugated plastic and three separate ½ pieces of self-enclosed foam. The Thomas padded drug box is able to securely hold over 50 separate drug vials, pre-fills, and medications stored in boxed form. It also includes a separate clear vinyl and lockable narcotic section. The padded center section now contains a clear vinyl zippered pouch for additional syringe or medication storage. The outside of the padded drug box includes a dry erase board and pen for patient note taking, recording vital signs, and medication re-stocking reminders.

Dimensions: 22” x 14” x 7”
The best-selling advanced life support pack in the industry is now the most VERSATILE with the addition of an internal lightweight frame, inset high impact wheels, and a telescoping tuck-away handle!!!

**Key NEW Features**

**Ultra light** (under 3.3 pounds!) internal frame featuring a telescoping handle and inset wheel system, while still maintaining full “backpack” functionality*

**Impervious**, quick-clean back panel which allows for rapid and easy decontamination and cleaning post response.

**Upgraded**, dual-adjust backpack straps with chest connect and “tuck-away” pocket, which allows the backpack straps to remain connected for quick carrying, yet protected from contaminants and everyday wear and tear.

**The Thomas ALS Roller** and ALS Pack also include two large exterior pockets, eight color coded removable sections, and four exterior removable clear vinyl pouches. All removable cases and pouches are securely fastened in the pack to avoid loss of equipment and supplies, and are easily removed when needed.

**Airway Section (TT 101)**
The airway section consists of three separate and removable color coded pouches, designed to hold an adult BVM and airways, a pediatric BVM, and a small intubation pouch set (handle, 4 blades, syringes, and other accessories). Each pouch now also contains a clear vinyl window for quick and easy labeling and identification of each pouch’s contents. The removable base of the airway section contains side slots for ET tube storage and allows all airway components to be removed from the pack simultaneously.
Cardiac / Drug Box (TT300)
Our soft drug box is protected by two pieces of poly-corrugated plastic and three separate ½ pieces of self-enclosed foam. The Thomas padded drug box is able to securely hold over 50 separate drug vials, pre-fills, and medications stored in boxed form. It also includes a separate clear vinyl and lockable narcotic section. The padded center section now contains a clear vinyl zippered pouch for additional syringe or medication storage. The outside of the padded drug box includes a dry erase board and pen for patient note taking, recording vital signs, and medication re-stocking reminders.

Dimensions 25” x 15’ x 14’
The Thomas Medical Support Pack is specifically designed to carry I.V. fluids and drugs necessary in the care of critically ill or injured patients.

This can be used as a stand-alone pack or as an excellent support pack to the Thomas ALS pack when more I.V. equipment and medications are needed.

All removable cases and pouches are securely fastened in the pack to avoid loss of equipment and supplies, and are easily removed when needed. The Medical Support Pack is useful as an advanced life support specialty pack for trauma, burn, cardiac, pediatric, or obstetrical transports.

The MSP Pack includes:
1 - Drug kit TT300,
3 - I.V. Bags #TT500 or TT510,
2 - MSP Exterior Inserts #TT604 ,
1 - Top Exterior Insert #TT124

AEROMED PACK

One of our best-selling packs, the Aeromed pack is an extremely space-efficient and durable pack.

The Aeromed Pack is specifically designed for initial care of the critically ill or injured patient.

The Aeromed Pack Features
- 4 interior color coded vinyl window pockets
- 3 medium exterior pockets
- 2 large exterior pockets
- 1 large hidden pocket
- 3 small vinyl window interior base pockets

The placement and closure of these pockets is specially designed to reduce the likelihood of equipment loss. The color coding and clear vinyl front pockets allow rapid location access of equipment and supplies as well as quick re-stocking. The ‘D’ rings on the back of the pack allow shoulder straps to be easily attached. The Redi-splint frame of the pack can also serve as a splint when needed.

Dimensions: 12” x 14” x 5”

EMERGENCY RESPONDER PACK (ER)

The ER Pack is specifically designed for initial care of the non-serious and critically ill or injured patient.

The ER pack is most commonly used for ambulance, search and rescue, high-rise rescue, helicopter or as a personal medical kit. In addition, the ER pack is an excellent specialty kit for traumatized, pediatric, neonatal, burn, obstetrical, cardiac or respiratory patients. The placement and closure of these pockets is specially designed to reduce the likelihood of equipment loss. The color coding and clear vinyl front pockets allow rapid location access of equipment and supplies as well as quick re-stocking. The ‘D’ rings on the back of the pack allow shoulder straps to be easily attached. The ladder frame of the pack can also serve as a splint when needed.

Features:
- 4 interior color coded vinyl window pockets
- 3 medium exterior pockets
- 1 large hidden pocket
- 3 small vinyl window interior base pockets

Dimensions: 12” x 14” x 5”
The outside of the TTP Airway kit includes a small pocket designed to hold gloves, Broselow tape, or an ALS pocket guide. The other side of the kit includes the Thomas dry erase board and pen, which can be used for patient note taking (vital signs, drugs administered, etc.) or equipment replacement reminders. The kit is protected throughout by three large pieces of ¼” foam to prevent any damage to blades syringes, drugs, or tubes. The Thomas Transport Pack Airway Kit is designed to easily slip into the large front pocket or drug box pocket of the ALS, EMP and MSP.

The inside section is designed to hold
- Laryngoscope blades and a medium or large handle
- Multiple size syringes from 10cc to 60cc
- Two sizes of Magill forceps and guide
- Lockable vinyl pocket for drugs or other accessories including batteries, smaller size syringes and airways
- Two other pockets (one vinyl) for storing up to 14 ET tubes and holders

Dimensions: 12" x 14" x 2"
Short Exterior Inserts
This pouch has a handle for easy carrying, and a clear vinyl front window allowing rapid identification of equipment and supplies.
Dimensions: 9”x 5”x 1”
TT104 - $7.00

Long Exterior Inserts
This pouch has a handle for easy carrying, and a clear vinyl front window allowing rapid identification of equipment and supplies.
Dimensions: 19”x5”x1”
TT114 - $11.25

Top Exterior Inserts
This pouch has a handle and a clear vinyl front window allowing rapid identification of equipment and supplies.
Dimensions: 5”x14”x1”
TT124 - $8.50

Drug kit
Our padded drug case provides superb protection for medications. The padded center page adds extra protection for fragile vials and has 2-vinyl window for printed material. Each side of the drug case has over 25 separate elastics to hold viles securely in place.
Dimensions: 13”x 9”x 3.5”
TT300 - $71.50

Aeromed Drug kit
The Aeromed padded drug case has a Cordura exterior for added durability. The exterior and interior padding provide superb protection for medications. The padded center page adds extra protection for fragile vials and has 2-vinyl window for printed material. Each side of the drug case has over 25 separate elastics to hold viles securely in place.
Dimensions: 13”x9”x3.5”
TT390 Orange TT392 Blue, TT394 Black, TT396 Red - $92.00

I.V. Bags
This I.V. Bag has a vinyl front window allowing rapid identification of equipment and supplies, and a handle for easy carriage. It is large enough to hold 1000cc of fluid, I.V. pressure bag, 6 catheters, Y-blood set, tape, alcohol and betadine swabs.
Dimensions: 11”x4”x 4”
TT510 - $16.50

Intubation Pouch
Our intubation pouch can hold intubation handle, tongue blades, tonsil suckers, curved blades, straight blades, 10cc syringe, xylodaine jelly, umbilical tape, extra light bulbs and batteries. It also has a belt clip on the back.
Dimensions: 8”x4”x2”
TT400 - $18.00

Center Airway Pouch
The base of this pouch is large enough to hold an adult bag-mask, tubing, and reservoir bag. The lid has 5 elastics to hold oral airways.
Dimensions: 8”x 8”x4”
TT103 - $10.25

Pediatric Airway Pouch
Color-coded blue/yellow this pouch can hold Intubation tube infant oral sucker, masks, tubing, peds-infant bag.
Dimensions: 8”x4”x2”
TT102 - $6.00

Shoulder Straps
Compatible with both the Emergency Responder and Aeromed packs. Fully adjustable and made from 1/2” closed cell foam, 420 pack cloth, and 1” nylon webbing.
TT850 - $9.00
THOMAS EMS is proud to announce the launch of the Thomas Hard Case Line, featuring 3 new Hard Cases combining the protection you desire from a Hard Case, with the organization, ease of use, and layout that you expect from a Thomas Transport Pack.

Large Removable Drug Case (TT 321; $115.00)*
The Thomas ALS Medication Hard Case features a Large Removable Padded Drug Case located in the lid of the Case. This allows several medics the flexibility to work out of the same Case in multiple victim situations. In single victim situations, the Drug Case can remain secured to the lid and still fully functional. The Padded Drug Box is secured to the lid of the Hard Case by 6 neodymium magnets, completely eliminating the need for Velcro. The use of fluid-resistant heavy weight vinyl and closed cell foam also significantly reduces breakage risk and makes decontamination and basic cleaning quick and easy. The layout of the elastic drug securing system and pocket design allows for the accommodation of all methods of drug delivery and storage (pre-filled, ampoules, boxed storage, etc…) The Drug Case also contains a clear vinyl locking section for narcotic storage.

Foam Divided Base (TT 742; $60)
The base of the Thomas ALS Medication Hard Case consists of a modular, foam divider system plus 2 removable fold outs featuring clear vinyl, color coded pockets. The adjustable foam dividers have been shortened in height slightly, to lessen the depth of the base section and to accommodate the two fold out sections. The base of the hard case can easily accommodate up to 3 liters of IV solution and accessories, your IO device, as well as additional medications. This design allows for all base contents to be quickly and easily viewed upon the opening of the Case. No more digging through the base of your Hard Case searching for equipment!

Complete ALS Hard Case includes TT321, TT742 and the Pelican 1550 Case.

*Includes galvanized steel plate and glue kit for lid mount.
Large Intubation Kit (TT 341; $115.00)*
The Thomas Airway Hard Case features a large removable Intubation Kit, located in the lid of the Case. The Intubation Kit can be removed and used by several medics in a multiple victim scenario, or remain secured to the lid and still fully functional. The Intubation Kit is secured to the lid by 6 neodymium magnets, which completely eliminates the need for Velcro on the outside of the kit. The Intubation Kit is designed to hold multiple intubation handles, Macintosh and Miller blades, ET Tubes, Magill forceps, airways, RSI medications, and all other needed intubation accessories. The use of fluid-resistant heavy weight vinyl on the outside of the intubation kit makes decontamination easy.

Foam Divided Base (TT 742; $60)
The base of the Thomas Airway Case consists of a modular, foam divider system plus 2 removable fold outs featuring clear vinyl, color coded pockets. The base of the Airway Case is designed to accommodate multiple adult and pediatric BVM’s.

*Includes galvanized steel plate and glue kit for lid mount.

Thomas BLS Hard Case BLS Lid Section (TT 331; $115.00)*
The Thomas BLS Hard Case features a removable lid section that contains 6 color coded pockets, designed to hold all of your BLS response equipment. The BLS features the same magnetic lid securing system as the other Thomas Hard Cases, and is made out of the same fluid-resistant material.

Foam Divided Base (TT 742; $60)
The base of the Thomas BLS Hard Case consists of a modular, foam divider system plus 2 removable fold outs featuring clear vinyl, color coded pockets. This design allows for all base contents to be protected and quickly and easily viewed upon the opening of the Case. The base of the Thomas BLS Hard Case can hold all of the contents that the lid can accommodate, thus allowing for two EMT’s to work on separate patients simultaneously from the same BLS Hard Case if needed.

*Includes galvanized steel plate and glue kit for lid mount.
The ChillCore™ Case enables therapeutic hypothermia induction to begin immediately ON-SCENE. The ChillCore™ Case keeps IV solutions at desired temperature (as low as 20˚ F) even in periods of extreme heat.* The ChillCore™ Case will comfortably store up to 2 liters of IV solution as well as RSI and other vital cardiac medications that require refrigeration.

The ChillCore™ Case automatically switches to battery power when removed from the vehicle and will operate on its own internal batteries for up to 90 minutes. A built in smart sensor "kicks up" the cooling power during extreme conditions.

- Maintains constant set temperature +/- 1°
- Interior LCD light illuminates the inside of the case in low visibility situations
- Exterior Dimensions: 19.2" x 15.2" x 7.3"
- Interior Dimensions: 12.5" x 9.5" x 3"
- Housed in a durable plastic case
- 12 volt vehicle power standard
- Optional 110 volt power supply sold separately

*In ambient temperature up to 120°.

PATENT PENDING
Inside the lid the contents are well organized. A double layer of elastic lined clear pockets assist with fast and secure placement of pharmaceuticals and other supplies.

Dual chamber design allows for storage of medications that require refrigeration (Ativan, Cardizem, RSI, etc..) as well as all the other medications that require room temperature storage.

Item | Description | Price

CLIMA1-O | Clima-Tech Dual Chamber Case, Orange | $1,895.00
CLIMA1-Y | Clima-Tech Dual Chamber Case, Yellow | $1,895.00
CLIMA1-DT | Clima-Tech Dual Chamber Case, Desert Tan | $1,895.00

Everything comes securely packaged in a rugged Pelican case. Built with stainless steel hardware and padlock protectors for optimum security.

Designed specifically for EMS use.

Now features 2 separate temperature controlled chambers!
80 Minutes! is the average amount of time a patient spends on a backboard.

The Back Raft is a low-cost, inflatable air mattress and spinal stabilization device that improves patient comfort and virtually eliminates the risk of pressure sores and other secondary injury during transport.

The Back Raft inflates in seconds, filling the voids between the patient and the backboard, thus eliminating pressure points.

- The Back Raft fills voids between the patient and spineboard
- A must for Geriatric Patients
- The dual action pump makes inflation of the Back Raft fast and easy
- Allows for full function of the backboard
- Insulates patients during cold weather

Product Specifications:
- 100% Latex Free
- 100% X-ray translucent
- Durable PVC construction
- Compatible with 16” and 18” boards
- Compatible with all C.I.D.’s
- 10” x 12” x 1/2” packaged
- Pump sold separately
- Compatible with any cot or spineboard strapping system

NEW latex free easy-close valve

Call us for a free BACK RAFT training video! Available upon request at 800-445-3640

If you’re not already using a Back Raft, STUDIES SHOW your patients wish you would.

TRANSPORTATION & IMMOBILIZATION

THOMAS BARIATRIC TRANSFER FLAT

The Thomas Transfer Flat is unique in that it may be used with or without a backboard.

- Backboard can quickly be attached to the center of the Thomas Flat.
- Ten outside, pre-molded support handles allow for even distribution of carrying and a comfortable grip.
- Heavy-duty vinyl construction is easily cleaned with soap and water, and comes with a durable storage bag.

Specifications:
Length: 72”, Width 46”
Maximum Weight Capacity: 1,000 lbs.
Operators: 2 – 10

THOMAS HANDLES

For EMS professionals, most back injuries occur while lifting.
The Thomas Handle is designed to reduce the amount of bending when lifting a backboard by adding approximately 12 inches to the lifting point, thus lessening back strain, eliminating awkward lifting angles, and minimizing abrasions on the hands and knuckles.

Key features of the Thomas Handles:
- Attach to any backboard
- Durable 1” nylon webbing and a rubberized, pre-molded handle with a strong non-slip grip
- Adjustable to fit EMS professionals of all sizes
- In-house custom embroidery to ensure identification

The Thomas MCI Man™ and MCI Ped™ are a smart, efficient way to help you conduct your MCI training and drills. These durable, inflatable training mannequins save money and time while significantly reducing the liability of conducting mass-casualty incident drills.

Advantages of MCI Man and MCI Ped
- The MCI Man and MCI Ped are always available and never call in sick
- The MCI Man and MCI Ped inflate in seconds so drill preparation is quick and efficient
- The MCI Man and MCI Ped can be used in the harshest of weather environments, and over an extended period of time
- The MCI Ped simulates a child involved in a mass casualty incident, which is difficult to do with live volunteers
- The MCI Man and MCI Ped are economical and reusable

Features of MCI Man™ and MCI Ped™:
- Clear chest pocket contains over 40 pre-scripted mass casualty injury scenarios*
- Compliant with JCAHO standards
- Available in adult and pediatric sizes
- Durable plastic material resists punctures
- Quick inflation / deflation
- Sandbags in feet keep mannequins in place
- Grommets on shoulders allow for tie-down
- Store away easily for re-use

Dimensions:
MCI Man™; 5’7” (170cm) 1.5 lb
MCI Ped™; 2’6” (36cm) 3 lbs

THOMAS TRIAGE PACK

A MUST FOR MASS CASUALTY INCIDENT AND TRAINING SCENARIOS!!
An economical triage pack designed around the START (Simple Triage and Rapid Treatment) system, plus two additional color tape rolls for WMD (contaminated patients and patients treated with an antidote).

The pack also includes:
- Trauma shears
- N95 Mask (one large, one medium)
- Antiseptic cleaning towelettes
- 2” cloth tape
- Penlight
- Sharpie pen
- Six roles of identification flagging (red, yellow, black, blue, green, orange).

Additional triage and treatment items can be added to this spacious fanny or shoulder pack.

Introducing the Cardio2Go Handheld EKG heart monitor!
The Cardio2Go Handheld EKG device reads a modified lead I rhythm anywhere instantly using patented dry-thumb receptors or wrist electrodes. Get on-the-spot 30-second analysis of:

- Heart Rate
- QRS duration
- ST elevation/depression

Now, you can identify heart arrhythmias before fatal rhythms occur. The Cardio2Go Handheld EKG records 30 seconds of modified EKG signal for each measurement. Vivid LCD screen instantly displays three parameter measurements: heart rate (HR), ST segment, and QRS interval. Get additional PR and QT/QTc analysis by simply downloading results to a laptop using software and USB cable provided. The EKG can then be emailed for emergency or specialized care - saving time and lives!

Patented dry-thumb electrodes and handheld design make Cardio2Go ideal for firefighter rehab, HAZMAT, and bike EMS. Cardio2Go comes with a padded Velcro cover, durable Pelican carrying case, and a 1-year limited manufacturer’s warranty.

Specifications:
- Sampling Frequency: 250 samples/sec
- Measurement Time: 30 seconds
- Display: 240 x 128 Dot-matrix LCD display
- Input: Dry conduction electrodes and/or external auxiliary electrodes
- Output: USB interface
- Power Supply: 1.5v (AAA) battery x 2
- Size: 124 x 78 x 22mm
- Weight: 150 g excluding battery
- Storage Temperature: -4° ~ 122°F
- Operating Temperature: 50° ~ 104°F
- Humidity: 25% ~ 95%
- Average HR: 45 - 180 bpm
- ST segment: -3 to +3 mm
- QRS interval: < 0.20 sec
