Zenith ALS/BLS or Airway Bag

The Zenith ALS/BLS or Airway bag is the perfect blend of size and space. It is ideal for the first in bag, featuring both backpack straps and over the shoulder option.

Made to accommodate a "D" sized tank and multiple sizes of BVM's, Intubation, IO, Pulse Oximetry, and other initial assessment and wound treatment supplies.

NEW

Features:

- 3 exterior pockets, and 2 glove stuff pockets
- Large interior compartment
- Removable sectional dividers for keeping equipment organized
- 2 large removable clear vinyl fronted pockets for storage and organization
- Padded base for protected storage of O2 tank
- Nylon straps and side release buckles to ensure secure storage

Superior construction:

- Made with reversed zippers to avoid bending zipper teeth
- Zippers not on edges of the bag to reduce zipper wear
- Only #10 YKK zippers, the best in the industry
- Made with 2 handle top carry system to avoid zipper stress when hefting or carrying the bag with the hand handles.
- All 1000 D Cordura
- High Visibility Zipper pulls for all exterior compartments and pockets
- Tuck-Away back pack straps for hands free carrying
- Will accommodate "Jumbo D" tank

Bio Armor

New Thomas EMS Fluid free material "Bio Armor" wears like Cordura and keeps fluids from penetrating material.

Warranty and Repair

Thomas EMS prides itself on making the most durable EMS packs in the industry. With that said, even the highest quality zippers, hardware, and fabrics will need repair from time to time. Please contact us at 801-262-6503 prior to sending us any pack for repair. Some repairs may not require the packs be sent back to us, and we may be able to send the replacement items directly to you. However, if your pack does require repair at our facility, please follow this simple cleaning procedure:

- 1) Remove all equipment from the pack, as well as all accessory pouches or other modules that do not need repair.
 - 2) Spray the pack with a pressure washer or thoroughly hand wash. DO NOT place the pack into a washing machine.
- The pack must be cleaned to ensure that the pack can be handled safely by our repairs department. A clean pack is also necessary to ensure that the pack does not gum up our sewing machines, and cause significant damage to our equipment.

- 3) Once the pack has been washed, please hang the pack to dry.
- 4) Box the pack up, and include all of your contact information (preferably on department letterhead), and clearly mark all areas of the pack needing repair.

Packs that are sent to our facility for repair that are not cleaned will have additional charges added to the repair cost and will be delayed.

Send all repair packs to:

Thomas EMS

ALS Ultra & ALS Ultra Roller

Let's ROLL!!

The ALS Ultra Roller represents the next generation in EMS ergonomics, eliminating the stress and strain of traditional paramedic equipment transport, while still maintaining all of the features of the ALS Ultra.

Key NEW Features

Ultra light (under 3.3 pounds!) internal frame featuring a telescoping handle and inset wheel system, while still maintaining full "backpack" functionality.

Impervious, quick-clean back panel which allows for rapid and easy decontamination and cleaning post-response.

Upgraded, dual-adjust backpack straps with chest connect and "tuck-away" pocket, which allows the backpack straps to remain connected for quick carrying, yet protected from contaminants and everyday wear and tear.

Oxygen and Airway Components

The ALS Ultra Roller and ALS Ultra are designed to accommodate up to a jumbo D size oxygen cylinder. The design of the ALS Ultra packs makes O2 access quick and easy by simply unzipping the top zipper pocket of the pack, which exposes the oxygen cylinder's valve, and eliminates the need to remove the cylinder to administer oxygen to the patient. These packs also include a cylinder sleeve and straps to secure the sleeve to the base of the pack.

The airway section consists of three separate and removable color coded pouches, designed to hold an adult BVM and airways, a pediatric BVM, and a small intubation pouch set (handle, 4 blades, syringes, and other accessories). Each pouch now also contains a clear vinyl window for quick and easy labeling and identification of each pouch's contents. A large interior clear vinyl removable support pouch, located on the inside lid of the pack, is also capable of holding approximately 16 ET tubes.

Intubation Pouch (TT400)

Center Airway Pouch (TT103)

Pediatric Airway Pouch (TT102)

ALS Ultra & ALS Ultra Roller

Cardiac / Drug Box

Our soft drug box is protected by two pieces of poly-corrugated plastic and three separate ½ pieces of closed cell foam. The Thomas padded drug box is able to securely hold over 50 separate drug vials, pre-fills, and medications stored in boxed form. It also includes a separate clear vinyl and lockable narcotic section. The padded center section now contains a clear vinyl zippered pouch for additional syringe or medication storage. The outside of the padded drug box includes a dry erase board and pen for patient note taking, recording vital signs, and medication re-stocking reminders.

NEW
removable,
adjustable
elastic loops.

I.V. Section

I.V. Fluids and accessories can be stored in three separate and removable fully self-contained I.V. pouches. All equipment necessary to start a peripheral I.V. line can be enclosed within each of these pouches, including 1000 ml of liquids, catheters, tubing, gauze, and swabs.

Support Pouches

This section consists of four versatile clear vinyl pouches designed to carry a wide variety of equipment and support supplies. The two large exterior pockets (now deeper and wider) provide additional storage space, designed to accommodate additional medications or a complete airway set.

Standard IV bag option.

Clear IV bag option.

ALS & ALS Roller

The best-selling advanced life support pack in the industry is now the most **VERSATILE** with the addition of an internal lightweight frame, inset high impact wheels, and a telescoping tuck-away handle!!!

Key NEW Features

Ultra light (under 3.3 pounds!) internal frame featuring a telescoping handle and inset wheel system, while still maintaining full “backpack” functionality*

Impervious, quick-clean back panel which allows for rapid and easy decontamination and cleaning post response.

Upgraded, dual-adjust backpack straps with chest connect and “tuck-away” pocket, which allows the backpack straps to remain connected for quick carrying, yet protected from contaminants and everyday wear and tear.

The **Thomas ALS Roller** and ALS Pack also include two large exterior pockets, eight color coded removable sections, and four exterior removable clear vinyl pouches. All removable cases and pouches are securely fastened in the pack to avoid loss of equipment and supplies, and are easily removed when needed.

Airway Section (TT 101)

The airway section consists of three separate and removable color coded pouches, designed to hold an adult BVM and airways, a pediatric BVM, and a small intubation pouch set (handle, 4 blades, syringes, and other accessories). Each pouch now also contains a clear vinyl window for quick and easy labeling and identification of each pouch’s contents. The removable base of the airway section contains side slots for ET tube storage and allows all airway components to be removed from the pack simultaneously.

Thomas 02 Pack

Loaded with all the features you have come to expect from Thomas EMS (hide-away heavy duty backpack straps, clear vinyl pockets, YKK reverse zippers, multiple carrying options), the Thomas 02 pack is designed to accommodate a "C", "D" or "Jumbo D" size oxygen cylinder, with plenty of room to spare for all accessories and related airway and trauma equipment.

Features:

- Multiple zip opening for easy access to the regulator
- Movable, padded internal dividers designed to accommodate multiple BVM's and other trauma and airway supplies
- Large exterior pockets can accommodate large dressings, C-Collars, or burn and emergency blankets
- Multiple carrying options (includes shoulder strap and back-pack straps)
- Made of 1000D water repellent nylon and YKK reverse zippers

Item	Description	Price
TT1200	Thomas 02 Pack	\$250.00

Main Compartment: 26.5" x 10" x 12"
Extended pockets: 26.5" x 19" x 15"

02 Lite

Thomas O2 Lite is a compact airway bag designed to accommodate all O2 and airway supplies when storage space is tight and multiple carrying methods are required.

The lid section has been engineered to open and remain upright during use to minimize supply loss and speed treatment time on scene.

The modular, removable and adjustable clear vinyl inside pockets are designed for maximum visibility and quick access of all airway supplies.

The O2 Lite features a fluid resistant, quick wipe down exterior material, hide away backpack straps, a shoulder strap, multiple padded handles, and Hi-Vis reflective striping. The O2 Lite can be stored either vertically or horizontally in your response vehicle with no shifting of equipment.

The ideal specialized, dedicated O2 pack for agencies that are looking for an easy wipe-down, compact, organized, and highly durable and versatile airway equipment solution.

Dimensions:
Length: 24"
Height: 11.5"
Width: 9"

Item	Description	Price
TFFF1250	Thomas O2 Lite, Fluid Free	\$250.00

The O2 Lite features a handy oxygen wrench pocket to keep wrenches from disappearing.

Our largest and most comprehensive 02 pack ideal for ALS response from both ambulance and fire apparatus.

The 02 Supreme features:

Designed to accommodate up to a "D" sized tank, multiple sizes of BVM's, intubation, IO, pulse oximetry, and all other initial assessment and wound treatment supplies.

Two large exterior pockets for additional storage of initial assessment, IO, or intubation equipment.

Interior

- Padded base for protected storage of 02 tank with nylon straps and side release buckles to ensure secure storage
- Nine clear vinyl interior zippered pouches with high visibility pull tabs

Exterior

- Two exterior handles that allows for easy removal from the cabinet and multiple carrying options
- High visibility zipper pulls for all exterior compartments and pockets.

Clear vinyl adjustable pockets in the base of the pack with clear vinyl tabs for easy marking and identification of all equipment.

Item	Description	Price
TT1275	02 Supreme, Black	\$450.00

Main Compartment: 22" x 14" by 7.5"
With Exterior Pockets Extended: 22" x 14 x 13".

Tuck-Away back pack straps for hands free carrying.

Pedi Pack

The Thomas EMS Pediatric Pack is the most organized and complete pre-hospital pediatric pack in the industry.

Main Compartment

Eight separate high visibility removable pouches designed to treat all pediatric patients up to 36kg. Each pouch is designed to accommodate all of the medical equipment necessary to treat a patient in each specified weight range.

The Thomas Pediatric Pack can also be used in conjunction with all existing pediatric systems.

All non-weight specific pediatric equipment (BVM, intubation handles, Magill forceps, syringes, etc...) can be stored inside the main inside chamber, or on the interior fold out flap. The fold out flap includes a neo-natal kit, and also features an area to display all quick reference material such as APGAR, Rule of 9, or other important local pediatric treatment information (burn center, poison control, etc...).

Interior Pouches

The interior of each removable pouch is constructed from a dry erase board material, which allows the medic to clearly label all equipment. Each pouch also includes an attached reference medication chart specific to each weight range, and a small vinyl note card size exterior sleeve to quickly and easily monitor expiration dates of all equipment contained within the pouch.

Dimensions: 20" x 14" x 9"

Made from rugged 1000 Denier Cordura, with a heavy weight fluid resistant nylon base for easy decontamination. Includes both a shoulder strap and carrying handles.

Inside lid section consist of two large clear vinyl pockets designed to store multiple pediatric c-collars and larger equipment.

Aeromed Pack

One of our best-selling packs, the Aeromed pack is an extremely space-efficient and durable pack.

The Aeromed Pack is specifically designed for initial care of the critically ill or injured patient. The Aeromed Pack is most commonly used for ambulance, search and rescue, high rise rescue, helicopter or as a personal medical kit. In addition, the Aeromed Pack is an excellent specialty kit for trauma, pediatric, neonatal, burn, obstetrical, cardiac or respiratory patients.

The placement and closure of these pockets is specially designed to reduce the likelihood of equipment loss. The color coding and clear vinyl front pockets allow rapid location access of equipment and supplies as well as quick re-stocking. The D rings on the back of the pack allow backpack straps to be easily attached. The ladder frame of the pack can also serve as a splint when needed.

The Aeromed Pack Features

- 4 interior color coded vinyl window pockets
- 3 medium exterior pockets
- 2 large exterior pockets
- 1 large hidden pocket
- 3 small vinyl window interior base pockets

Fill kit available. See page 17.

Equipment sold separately

Optional backpack straps. See page 19.

Intubation Kit

The Thomas Intubation kit is protected throughout by three large pieces of 1/4" foam to prevent any damage to blades syringes, drugs, or tubes. The Thomas Transport Pack Airway Kit is designed to easily slip into the large front pocket or drug box pocket of the ALS, EMP and MSP.

The inside section is designed to hold:

- Laryngoscope blades and a medium or large handle
- Multiple size syringes from 10cc to 60cc
- Two sizes of Magill forceps and guide
- Lockable vinyl pocket for drugs or other accessories including batteries, smaller size syringes and airways
- Two other pockets (one vinyl) for storing up to 14 ET tubes and holders

Dimensions: 13" x 9" x 3.5"

Equipment not included. Fill kit available. See page 17.

CUSTOMIZED SOLUTIONS

If you can dream it, we can sew it!

Thomas EMS still manufactures its products right here in America.

Our in-house sewers specialize in custom design to meet your service needs. We understand all agencies are unique in their equipment and response needs, and one pack does not fit all. It would be our privilege to work with you on your custom design.

For larger packs, the quickest and most cost effective method of design and development is to choose of our existing shells (ALS Ultra, ALS, EMP, etc...) and contact us with your ideal modifications.

For smaller insert pouches, a picture with specs or a sample is all we need to get started. Contact us today with your bag and pack ideas for your perfect solution.

AED Pack with External Removable Padded Pocket

The Thomas AED pack is designed to safely secure, transport, and store virtually all models of automatic external defibrillators on the market today.

The outside of the pack is clearly marked for quick and easy identification of the unit and the large front external pocket is capable of carrying even the largest AED currently in use. The AED pocket is lined with 1/2 inch Evazote foam on all sides with to keep the AED safe during any usage.

NEW

Inside the pack, a redi-splint on all sides, which can also be removed and used in any situation that requires splinting. The large clear vinyl pocket located immediately behind the AED allows for the storage of multiple adult electrodes. The location and size of the vinyl pocket also allows the electrodes to be stored in the "attached" position, saving valuable time at the scene.

Three additional vinyl pockets are also provided for the storage of pediatric electrodes, clippers, gloves, or razors. There is more than enough room for a myriad of other supplies, and general BLS gear.

Manufactured with 1000 Dupont denier coated Cordura and 400D pack cloth, YKK reverse pulls and zipper, The Thomas AED pack also contains multiple D rings for quick and easy attachment of backpack straps or attachment to other packs.

Item	Description	Price
TT831	AED Pack with External Removable Padded Pocket	\$170.00

AED Pack

The Thomas AED pack is designed to safely secure, transport, and store virtually all models of automatic external defibrillators on the market today.

Inside the pack, the AED is firmly secured to the base by two adjustable straps and protected by half inch of Evazote foam on the base and a redi-splint on all sides, which can also be removed and used in any situation that requires splinting. The large clear vinyl pocket located immediately above the AED allows for the storage of multiple adult electrodes. The location and size of the vinyl pocket also allows the electrodes to be stored in the "attached" position, saving valuable time at the scene.

The outside of the pack is clearly marked for quick and easy identification of the unit and the large front external pocket is capable of carrying even the largest rechargeable Lithium or spare NiCd battery. The three outside zip down pockets are designed to hold an adult BVM, or other AED accessories, such as cables, simulators, training pads, or CPR supplies.

Top Exterior Inserts
This pouch has a handle and a clear vinyl front window allowing rapid identification of equipment and supplies. Dimensions: 5" x 14" x 1"
TT124 - \$9.50

ALS Hard Case

Keep your ALS equipment and pharmaceuticals in a lockable, durable and organized hard case.

Large Removable Drug Case TT321 (\$135.00)

The Thomas ALS Medication Hard Case features a Large Removable Padded Drug Case located in the lid of the Case. This allows several medics the flexibility to work out of the same Case in multiple victim situations. In single victim situations, the Drug Case can remain secured to the lid and still fully functional.

The Padded Drug Box is secured to the lid of the Hard Case by 6 neodymium magnets, completely eliminating the need for Velcro. The use of fluid-resistant heavy weight vinyl and closed cell foam also significantly reduces breakage risk and makes decontamination and basic cleaning quick and easy.

The layout of the elastic drug securing system and pocket design allows for the accommodation of all methods of drug delivery and storage (pre-filled, ampoules, boxed storage, etc..) The Drug Case also contains a clear vinyl locking section for narcotic storage.

Foam Divided Base TT742 (\$60.00)

The base of the Thomas ALS Medication Hard Case consists of a modular, foam divider system plus 2 removable fold outs featuring clear vinyl, color coded pockets. The adjustable foam dividers have been shortened in height slightly, to lessen the depth of the base section and to accommodate the two fold out sections.

The base of the hard case can easily accommodate up to 3 liters of IV solution and accessories, your IO device, as well as additional medications. This design allows for all base contents to be quickly and easily viewed upon the opening of the Case. No more digging through the base of your Hard Case searching for equipment.

Interior Dimensions: 18.25" x 14" x 7"

Item	Description	Price
TT424	ALS Hard Case Complete, Orange	\$403.57

TT434	ALS Hard Case Complete, Yellow	\$403.57
TT321	Large Removable Padded Drug Case	\$135.00
TT742	Modular Foam Divider System	\$85.00

Complete ALS Hard Case includes TT321, TT742 and the Pelican 1550 Case.

Neodymium magnets maintain 99.5% of their strength for up to 100 years!!

Airway Hard Case

Large Intubation Kit TT341 (\$135.00)

The Thomas Airway Hard Case features a large removable Intubation Kit, located in the lid of the Case. The Intubation Kit can be removed and used by several medics in a multiple victim scenario, or remain secured to the lid and still fully functional. The Intubation Kit is secured to the lid by 6 neodymium magnets, which completely eliminates the need for Velcro on the outside of the kit.

The Intubation Kit is designed to hold multiple intubation handles, Macintosh and Miller blades, ET Tubes, Magill forceps, airways, RSI medications, and all other needed intubation accessories. The use of fluid-resistant heavy weight vinyl on the outside of the intubation kit makes decontamination easy.

Foam Divided Base TT742 (\$85.00)

The base of the Thomas Airway Case consists of a modular, foam divider system plus 2 removable fold outs featuring clear vinyl, color coded pockets. The base of the Airway Case is designed to accommodate multiple adult and pediatric BVM's.

Item	Description	Price
TT431	Airway Hard Case Complete, Orange	\$403.57
TT432	Airway Hard Case Complete, Gray	\$403.57
TT433	Airway Hard Case Complete, Yellow	\$403.57
TT341	Large Intubation Kit	\$135.00
TT742	Modular Foam Divider System	\$85.00

Complete Airway Hard Case includes TT341, TT742 and the Pelican 1550 Case.

BLS Hard Case

Thomas BLS Hard Case BLS Lid Section TT331 (\$128.50)

The Thomas BLS Hard Case features a removable lid section that contains 6 color coded pockets, designed to hold all of your BLS response equipment. The BLS features the same magnetic lid securing system as the other Thomas Hard Cases, and is made out of the same fluid-resistant material.

Foam Divided Base TT742 (\$85.00)

The base of the Thomas BLS Hard Case consists of a modular, foam divider system plus 2 removable fold outs featuring clear vinyl, color coded pockets. This design allows for all base contents to be protected and quickly and easily viewed upon the opening of the Case. The base of the Thomas BLS Hard Case can hold all of the contents that the lid can accommodate, thus allowing for two EMT's to work on separate patients simultaneously from the same BLS Hard Case if needed.

Item	Description	Price
TT428	BLS Hard Case Complete, Gray	\$403.57
TT429	BLS Hard Case Complete, Orange	\$403.57
TT430	BLS Hard Case Complete, Yellow	\$403.57

TT742	Modular Foam Divider System	\$85.00

Complete BLS Hard Case includes TT331, TT742 and the Pelican 1550 Case.

ALL THOMAS HARD CASE INSERTS ARE DESIGNED FOR USE IN THE PELICAN 1550 OR EQUIVALENT SIZED CASE.

Clima-Tech

Clima-Tech is the first “portable climate controlled” case specifically designed for EMS.

Everything comes securely packaged in a rugged Pelican case. Built with stainless steel hardware and padlock protectors for optimum security.

The Clima-Tech’s main storage compartment measures 14” W x 13” D x 6” H, providing adequate space for medications that require room temperature storage.

Clima-Tech is designed by EMS professionals for use in extreme hot or cold conditions. When storing pharmaceuticals there are situations where a controlled environment is not available. Ensure proper temperature control for your drugs with the Clima-Tech Climate Controlled EMS Case. Clima-Tech will allow pharmaceuticals to be temperature controlled for up to 3 hours while running on battery power.

Specifications:

- Maintains 30 degrees off ambient temperature
- Automatically maintains +/- 1 degree from set temperature
- Retractable extension handle/polyurethane wheels
- External digital temperature display
- Interior Dimensions : 14” x 13” x 6”
- Includes 12 volt vehicle power supply
- Mounting bracket included
- Smart Sensor monitors temperatures both in and out of the case, simultaneously adjusting the heating/cooling profiles for best temperature regulation
- Custom colors are available in desert tan, orange and black

NOTE: Clima-Tech no longer has a battery option.

The Clima-Tech offers:

- Easier access to their stored products
- Better utilization and organization of space
- Higher level of security for pharmaceuticals
- Superior product protection
- Built within the durable housing of the Pelican #1560.

Inside the lid the contents are well organized. A double layer of elastic lined clear pockets assist with fast and secure placement of pharmaceuticals and other supplies.

Item	Description	Price
CLIMA1-O	Clima-Tech Case, Orange	\$1,895.00
CLIMA1-Y	Clima-Tech Case, Yellow	\$1,895.00
TT656	110 V Charger for Clima-Tech	\$60.00

Warranty: 1 year parts and labor.

PATENT PENDING

Not intended for the storage of blood.

Temperature Control

4-Liter IV Warmer

Built of rugged 1000D Cordura™, the Thomas EMS 4-Liter IV warmer is everything you've come to expect from Thomas EMS.

It is the only IV warmer that can bring up to 4 liters of fluid up to body temperature and keep them ready for use as long as power is supplied. Just plug in the 12 V power supply and forget it, all your IV's will be body temperature, the moment you need them, no hassle.

The entire case is surrounded with 2 layers of insulation. First a ½ inch closed cell foam providing structure as well as insulation, with an inner lining of Mylar™ heat reflective material.

NEW

Key Features Include:

- 4 liter capacity
- Fuse Protected Power Supply
- Anodized Aluminum Heater Housing
- Fuse Protected Circuit Board Controller
- 12 Volt Operation
- Optional 110 V power supply
- Insulated Cordura™ Bag
- Mylar™ Heat Reflective Inner Lining
- Optional insulated IV bag, and IV line insulators
- 1 yr. electronics warranty

Item	Description	Price
TT661	Thomas EMS 4-Liter IV Warmer	\$410.00
TT521	Insulated IV Tubing, 72" (sold separately)	\$25.00

Heating Pack

The Thomas Heating Pack is the largest and most complete IV fluid and medication warmer in the EMS industry.

Features of the pack include three interior color coded pockets with elastics designed to hold medications or other IV supplies, and two removable clear vinyl exterior pockets. The outside of the pack is constructed from 1000D water resistant fabric with protective foam and aluminum insulated polyethylene bubbles for maximum heat radiance and temperature maintenance. The exterior of the pack also includes reflective striping for improved visibility.

Additional Features:

- Back pack straps with chest connect that tuck away
- Holds up to 3 liters of IV fluids as well as all tubing accessories
- Includes 1 fully insulated IV bag (pressure infused capable) with removable insulated tubing
- Fuse protected and easily removable ALUMINUM heating element
- Includes a redi-splint that serves as the frame of the pack
- Pre-set 98 degree temperature maintained (+/- 1 degree) while plugged in
- 12 volt operation
- Warranty: 1 year parts and labor

Insulated IV Pressure Infuser Bag included.

Large Mobile Medical Cabinet

Automatic Heating and Cooling

Large Mobile Medical Cabinet Overview

- Unit is installable in a variety of configurations
- Functional in mobile, temporary or stationary environments
- Reliable, Robust and Low Maintenance Solid-State technology
- Snap locks for fast and consistent access to contents
- Multiple locking, tracking & reporting options (see page 30)
- High tech insulation and thermoelectric proportional controlled methodology
- Manufactured in U.S.A.

PRESET AT
70

Electrical

The Large Mobile Medical Cabinet operates at 12 or 24 VDC, AC power conversion optional. Peak power Consumption is dependent upon model and operating environment but typical power consumption at normal ambient temperatures (100F to 30F) is 50-80% of peak. Unit can be equipped with optional low voltage shutdown. (when voltage is restored the unit automatically restarts).

Temperature Control

Heating and cooling is accomplished using high efficiency thermoelectric technology. The temperature control boards use a proportional control program to maintain minimal temperature variation inside the unit. Internal temperature is preset but custom temperature settings are available. Insulation is state of the art vacuum and PU panels that provide a barrier of maximum efficiency from external temperatures.

Design

The Large Mobile Medical Cabinet contains no CFC's nor harmful contaminants requiring only standard tools for installation. Unit is field serviceable with the field service guide. Unit can be configured to operate on 120/220 VAC with optional DC power conversion. OTE engines are designed and manufactured to work day in and day out in the toughest conditions.

Thomas Handles

For EMS professionals, most back injuries occur while lifting.

The Thomas Handle is designed to reduce the amount of bending when lifting a backboard by adding approximately 12 inches to the lifting point, thus lessening back strain, eliminating awkward lifting angles, and minimizing abrasions on the hands and knuckles.

Before

After

Key features of the Thomas Handles:

- Attach to any backboard
- Durable 1" nylon webbing and a rubberized, pre-molded handle with a strong non-slip grip
- Adjustable to fit EMS professionals of all sizes
- In-house custom embroidery to ensure identification

Item	Description	Price
THS810	Thomas Handles (Set of 4)	\$23.00

MCI Man & MCI Ped

The Thomas MCI Man™ and MCI Ped™ are a smart, efficient way to help you conduct your MCI training and drills.

Advantages of MCI Man and MCI Ped

- The MCI Man and MCI Ped are always available and never call in sick
- The MCI Man and MCI Ped inflate in seconds so drill preparation is quick and efficient
- The MCI Man and MCI Ped can be used in the harshest of weather environments, and over an extended period of time
- The MCI Ped simulates a child involved in a mass casualty incident, which is difficult to do with live volunteers
- The MCI Man and MCI Ped are economical and reusable

Features of MCI Man™ and MCI Ped™:

- Clear chest pocket contains over 40 pre-scripted mass casualty injury scenarios*
- Compliant with JCAHO standards
- Available in adult and pediatric sizes
- Durable plastic material resists punctures
- Quick inflation / deflation
- Sandbags in feet keep mannequins in place
- Grommets on shoulders allow for tie-down
- Store away easily for re-use

These durable, inflatable training mannequins save money and time while significantly reducing the liability of conducting mass-casualty incident drills.

Dimensions:

MCI Man™; 5'7" (170cm) 1.5 lbs

MCI Ped™; 2'6" (36cm) 3 lbs

Item	Description	Price
THS600	MCI Man™	\$65.00
THS650	MCI Ped™	\$50.00
THS690	Turbo Pump, Electric	\$28.00

*Download pre-scripted mass casualty scenarios at www.thomasems.com.

Additional triage and treatment items can be added to this spacious fanny or shoulder pack.

Item	Description	Price
THS500	Thomas Triage Pack	\$85.99

AlbacMat Emergency Rescue Mat

Designed to allow ONE person to safely transport another.

The unique and innovative design of the AlbacMat enables you to move a patient up or down stairs as well as across all types of terrain. Perfect for safe and effective evacuation of frail or immobile children or adults. Holds up to 800 lbs. No wheels to snag, no pulleys to rig.

- Tapered for patient comfort
- Easily accessible multi straps for securing the patient
- Insulated board provides patient protection
- Fluorescent yellow straps for detection in dim lighting
- Foot rest pocket for comfort and security of patient
- Polypropylene board acts as insulator over surfaces
- Three separate handles for rescuer's ease
- Simple instructions clearly visible on self-storage pocket
- Unroll, strap in and go!

Dimensions: 75" long, x 24" wide (at widest point)
 Storage Size: 14" x 7" x 7"
 Weight: 4lbs 11oz
 Load Capacity: 800 lbs

The AlbacMat is constructed from customized materials - including polypropylene board and a lightweight canvas material. These materials have been extensively tested in all types of situations. The polypropylene board acts as an insulator to the patient and absorbs any concussions incurred while in transit.

CUSTOMIZED SOLUTIONS

If you can dream it,
Thomas EMS can sew it!

Thomas EMS still manufactures its products right here in America.

Our in-house sewers specialize in custom design to meet your service needs. We understand all agencies are unique in their equipment and response needs, and one pack does not fit all. It would be our privilege to work with you on your custom design.

For larger packs, the quickest and most cost effective method of design and development is to choose of our existing shells (ALS Ultra, ALS, EMP, etc...) and contact us with your ideal modifications.

For smaller insert pouches, a picture with specs or a sample is all we need to get started. Contact us today with your bag and pack ideas for your perfect solution.

Tactical Black

TACTICAL BLACK OPTIONS

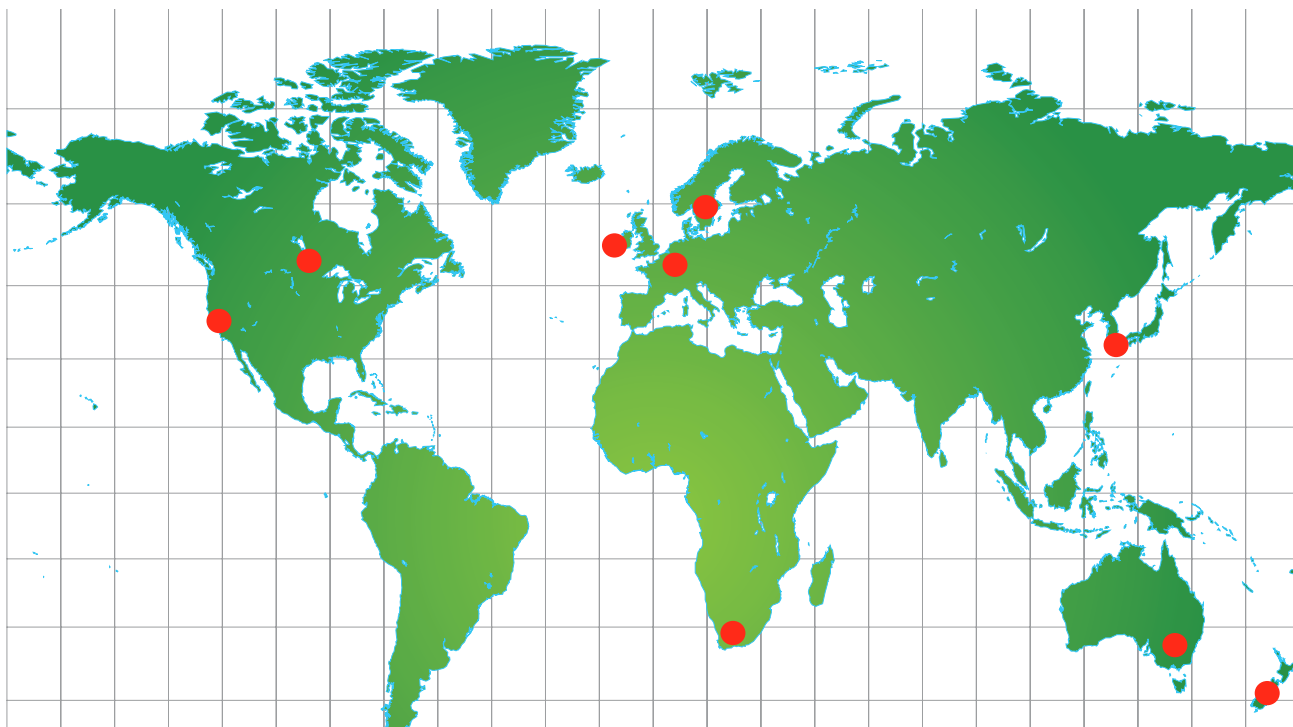

All Thomas EMS packs are available in tactical black.

Contact us for order information. 800-445-3460 or info@thomasems.com.

Since 1984 Thomas Transport Packs has been synonymous with the finest quality and most innovative EMS packs in the world. While this history of innovation continues at Thomas with the introduction of the new ALS Ultra Roller and ALS Roller, we are proud to announce the development of a number of new innovative EMS products. These products and many more currently being evaluated, represent some of the most innovative, high quality, and practical products on the market today.

Thomas EMS guarantees all of our products against defects and workmanship and / or materials for the practical life of the products.

Back Raft[®]

SPINAL STABILIZATION AIR MATTRESS

80
Minutes!
is the average amount of time
a patient spends on a backboard.

The Back Raft is a low-cost, inflatable air mattress and spinal stabilization device that improves patient comfort and virtually eliminates the risk of pressure sores and other secondary injury during transport. The Back Raft inflates in seconds, filling the voids between the patient and the backboard, thus eliminating pressure points.

NEW & IMPROVED

Hand Pump!

Significantly more durable.
Twice the air capacity.

A MUST FOR GERIATRICS and LONGER TRANSPORTS

Product Specifications:

- 100% Latex Free
- 100% X-ray translucent
- Durable PVC construction
- Compatible with 16" and 18" boards
- Compatible with all C.I.D.s
- 10" x 12" x 1/2" packaged
- Pump sold separately
- Compatible with any cot or spineboard strapping system

Call us for a free BACK RAFT training video! Available upon request at 800-445-3640

The new easy on/off valve makes pressure control simple.

Three columns of air support the head and neck, reducing the pressure point on the back of the head while enhancing spinal immobilization.

Plastic straps loop around the head of any backboard and secure the head end of the Back Raft.

The Back Raft is fast and easy to apply. Once applied it can remain on the board while stored away on the ambulance.

Seven columns of air support the shoulders and lower back, reducing the pressure on critical pressure points.

An adhesive strip running along the bottom of the Back Raft allows the Back Raft to be secured to the board.

Item	Description	Price
THS100	Back Raft, each (hand pump not included)	\$24.75
THS150	Back Raft Pump	\$29.95

Digital Entry Narcotics Box

With Tattletale Technology

Narcotic and controlled substance security is one of the key challenges facing the EMS and Fire Industries. Balancing maximum controlled substance security, with quick access to these medications in critical patient response scenarios is a necessity.

Easy Setup

There is no software to purchase or install with the Narc Box™. After purchasing the Narc Box™ simply register online and you are automatically logged in to your account on the Narc Box™ secured server and are ready to begin.

An easy 4 step process will walk you through the account set up:

1. Add Admin/supervisors to your account.
2. Add Narc Boxes and assign Narc Boxes to specific vehicles.
3. Add Paramedics/Employees to your account.
4. Use the online instructions or pdf to connect to Wifi and SYNC your Narc Boxes.

Access your account and run reports from anywhere you have an internet connection. In the office or on the road the Narc Box™ Secure Server allows you to access your account anywhere you have internet access.

Run date based reports on the following information:

Activity by Paramedic/Employee
 Activity by Station
 Activity by Medication
 Activity by Narc Box™
 Activity by Vehicle
 Master Activity Report
 Set Automated Reports

Item #	Description	Price
